Gabor Bethlen National Programme
Jobbik – The Movement For A Better Hungary

New Power – New Radicalism

The document hereinafter is a disputation of the Bethlen Gábor Platform set out by Jobbik Magyarországért Mozgalom.

Our objective is to work out overall national guidelines for the sake of the development and improvement of the Hungarian nation.

Gábor Bethlen was able to rank Transylvania among the most influential European states in terms of political social, cultural and economic issues notwithstanding the warfaring situation of the tri-parted country. We are inspired by his example when we outline our strategy.

Our objectives are as follows:

- itemized supervision of public debts, negotiations on pay-off;
- subordinate monetary policy to overall national interests;
- draw an itemized assets inventory control, supervise privatization, severe jurisdiction for the infringement of rights;
- nationalize strategic industries;
- parliamentary resolutions on EU resources;
- erect a supervisory committee called 'Where is the Money?' for highlighting state level corruption after 2002;
- make the Minister of Finances render quarterly reports on Hungarian economic situation;
- stop liberalization in energy sectors.

A Human State

Hungary needs a value-based democracy where the state protects individuals and basic human values and provides people with the conditions of a healthy and just life. Therefore our targets are as follows:

- rational and equitable public burdens;
- maintain a one-social security company system;
- stop the destruction of healthcare;
- progressive and multi-level taxation system
- terminate compulsory private pension fund, maintain individual fund handling;
- cancel tax allowances provided for multinational companies;
- support small and medium private businesses especially family businesses and private entrepreneurs;
- allocate operating capital to out of border Hungarian and foreign regions;
- operative trade unions;
- attach unemployment aid to public labour or grant it in food, clothing, medicine or public utility vouchers.

Constitutionality

After German occupation in 1944, Hungary was deviated from legal continuity and neither communism nor the system change clientele was interested in restoring constitutionality, so we aim:

- to replace the current Constitution with one based upon Szent Korona-doctrines.

Mother Earth

Whatever opportunities Hungary may have due to her geographical situation, agriculture is the most agonized sector of the past decades. Therefore our objectives are as follows:

- modify Hungarian earth laws and hinder foreign earth purchase;
- protect natural resources, reasonable utilization thereof, especially soil, drinking water, thermal water and gas;
- re-negotiate agricultural quotas stipulated by the EU with special regard to those detrimental to Hungarian farmers and companies.

'Multiply thy'

The most severe problem of Hungary is the decrease of population. Our objectives in this issue are:

- legally protect the foetus from conception;
- 25% of the personal income tax paid by any grown up child to be added to the old age pension of the parents;
- replace personal income tax with family taxation;
- restart and prime support of the test-tube baby program;
- abolish unjustified sterilization;
- restrain immigration of population incapable of assimilation.

Family Background

The foundation of a healthy and powerful society is the healthy and powerful family. That is the reason why it is vital to provide legal support to traditional family structures in public areas especially in education, culture and media. We wish:

- to provide high tax allowance to employers that employ mothers working from home or part-time;
- to establish the status of professional motherhood for 75% of the latest salary;
- to provide the public registration of church weddings;
- to operate a universal value-based system of media;
- to observe commercial channels and excise immediate penalty for breach;
- to abolish death-tax.

The Fundamental Investment

It is essential to stop the deterioration of Hungarian education standards and to protect its traditional values and strategies. Our objectives in this area are the following:

- cease the system of two-level final exams;
- restore high quality vocational training and align its structure with national standards and interests;
- restructure the Hungarian course book market, introduce strict quality observation;
- stop quality destruction in higher education;
- introduce obligatory moral and religious education in primary and secondary education;
- introduce a central governmental strategy in order to join European internet usage levels.

Our Past Is Our Spring

There is no future without national traditions, symbols and values. It is very important to maintain them and preserve our roots. Therefore we aim:

- to erect a National Institute of Ancient History to support research in proving the Hun-Avar-Hungarian historical continuity;
- to stipulate and provide legal protection for the Hungarian Sacra Corona, the Turul and the Arpad-striped flag (ancient Hungarian symbols);
- to legally exclude ex-communist executives from Hungarian public life;
- to establish a Hungarian strolling company in order to improve cultural life in the provincial areas;
- to relocate the Russian memorial coloumn from Szabadság Square, to remove the statue of Mihály Károlyi from Kossuth Square and to erect a memorial in honour of Miklós Horthy, Albert Wass, Pál Teleki and Ottokár Prohászka;
- to provide central financial support to performances, plays and musical pieces of art that authentically show Hungarian history.

Law and Order

A healthy nation observes and complies with national standards, rules and regulations, maintains public safety and struggles against crime. For this purpose we would like:

- to restore death penalty in case of life-threatening acts;
- to involve prison inmates in public labour;
- to tighten the Penal Code for the benefit of protecting life, safety and property;
- to remove homeless people from public places along with settling them in appropriate accommodation;
- to establish a corporate police unit for gypsy delinquency prosecution in the critical areas;
- to organize a volunteer National Guard.

Environment Protection

Economic development provides a nation's welfare unless the Present exhausts the Future's opportunities so we are obliged to protect our environment. Therefore we are going to:

- to label all genetically modified products or food containing ingredients that may originate from an animal fed with genetically modified food;
- to endorse the foundation of energy plantations in special areas inappropriate for traditional cultivation;
- to enforce strict stipulations against environment contamination and waste allocation.

Each Hungarian is Liable for the Others

The greater and more united a nation is, the easier it is to survive historical events and to flourish, that is why it is essential to reunite Hungarians beyond the borders of Hungary and to recover from the disaster suffered in Trianon (Treaty signed in 1920 about dissecting the country into pieces). Therefore our objectives are as follows:

- to declare June 4th a Memorial Day;
- to ensure Hungarian citizenship for the Hungarians outside Hungary;
- to support the endeavours for autonomy of beyond-border Hungarians;
- to restore the Permanent Platform;
- to declare the Arpad-striped flag a Hungarian national symbol.

The European Union

The EU is, and must remain, a powerful, multicultural community based upon the equality of nations. We wish to contribute to these objectives with

- negotiating and announcing a referendum about the mutual European Constitution;
- cooperating with the countries of our region;
- protecting European values and interests against the increasing American influence of economic and cultural globalization.
